

ATLANTECH E-LUX HEAVY 1300
Verified for Enel poles 12E17, maximum base diameter 425 mm

The following maximum stresses at the base due to the loads applied on the lighting pole were considered for the verification of the Atlantech E-Lux Heavy 1300 foundation.

	Maximum stress
Bending moment	102.26 kNm

The Atlantech E-Lux Heavy 1300 foundation, loaded with the above stresses, is verified with soils having the following geotechnical characteristics.

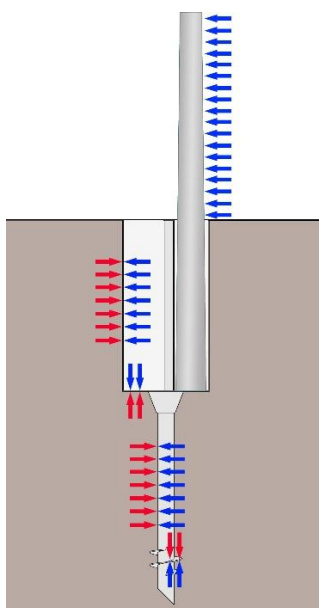

Cohesive soils

<i>Cohesion not drained</i>	$C_u = 0.5 \text{ kg/cm}^2 = 5000 \text{ kg/m}^2$
	$\text{Weight} = \gamma = 1900 \text{ kg/m}^3$

Cohesionless soils

<i>Cut resistance angle</i>	$\varphi = 30^\circ$
	$\text{Weight} = \gamma = 1900 \text{ kg/m}^3$

Indicative scheme of behavior of the Atlantech Lux foundation

ATLANTECH SRL
