

ATLANTECH E-LUX SMALL 1300 Verified for Enel poles 12B14 and 12B10, maximum base diameter 260 mm

The following maximum stresses at the base due to the loads applied on the lighting pole were considered for the verification of the Atlantech E-Lux Small 1300 foundation.

| | Maximum stress |
|----------------|----------------|
| Bending moment | 35.22 kNm |

The Atlantech E-Lux Small 1300 foundation, loaded with the above stresses, is verified with soils having the following geotechnical characteristics.

Cohesive soils

| Cohesion not drained | $Cu = 0.5 \ kg/cm^2 = 5000 \ kg/m^2$ |
|----------------------|--------------------------------------|
| | $Weight = y = 1900 \ kg/m^3$ |

Cohesionless soils

| Cut resistance angle | $arphi=30^{\circ}$ |
|----------------------|------------------------------|
| | $Weight = y = 1900 \ kg/m^3$ |
